

ASME PTC 19.2-2010
[Revision of ASME/ANSI PTC 19.2-1987 (R2004)]

Pressure Measurement

Instruments and Apparatus Supplement

Performance Test Codes

AN AMERICAN NATIONAL STANDARD

Three Park Avenue • New York, NY • 10016 USA

CONTENTS

Notice	vi
Foreword	vii
Acknowledgments	vii
Committee Roster	viii
Correspondence With the PTC 19.2 Committee	ix
Section 1 Object and Scope	1
1-1 Object	1
1-2 Scope	1
1-3 Uncertainty	1
Section 2 Definitions and Terms	2
2-1 Introduction	2
2-2 Definitions	2
2-3 Units	3
2-4 Dynamic Measurements	3
2-5 Use of Control and Operating Instrumentation	4
2-6 Two-Phase Fluid Systems	5
Section 3 Measurement Devices	6
3-1 Types of Devices	6
3-2 Pressure Transmitters and Their Applications	12
3-3 Elastic Gauges and Their Applications	31
Section 4 Calibration and Standards	36
Section 5 Measurement Installations	37
5-1 Pressure Taps	37
5-2 Pressure Probes	37
5-3 Connecting Piping	47
5-4 Diaphragm Seals	48
5-5 Installation Effects	55
Section 6 Uncertainties in Pressure Measurement	57
6-1 Introduction	57
6-2 Combined Standard Uncertainty and Expanded Uncertainty	57
6-3 Random Standard Uncertainty	57
6-4 Using Elemental Random Error Sources	57
6-5 Systematic Standard Uncertainty	58
6-6 Propagation of Measurement Uncertainties Into a Result	58
6-7 Uncertainty of Measurements (Example)	58
Figures	
2-2-1 Pressure Terminology	3
3-1.1-1 Typical Pressure Devices	7
3-1.2.1-1 Wheatstone Bridge	7
3-1.2.1-2 Bonded Strain Gauge	8
3-1.2.2-1 Typical Deposited-Thin-Film Strain Gauge	8
3-1.2.3-1 Typical Piezoresistive Pressure Sensor	9
3-1.2.4-1 Typical Variable Capacitive Pressure Sensor	10
3-1.2.5-1 Photoelectric Pressure Sensor	10
3-1.2.6-1 Inductive Pressure Sensor	11
3-1.2.7-1 Preferred Schematic Representation of the Linear Variable Differential Transformer (LVDT)	11

3-1.2.8-1	Piezoelectric Pressure Sensor	11
3-1.2.9-1	Pressure Transducer With Vibrating Element	12
3-2.1.1-1	Typical Flow Installations	15
3-2.1.1-2	Exploded View of Differential-Pressure Transmitter	16
3-2.1.2.1-1	Flange-Mounted Transmitters	17
3-2.1.2.1-2	Flange Transmitter Mounted Directly to Tank Nozzle	18
3-2.1.2.1-3	Open-Tank Installation With Remote-Seal Type of Transmitter	18
3-2.1.2.2-1	Schematic Diagram of Closed-Tank Transmitter Primary	19
3-2.1.2.2-2	Closed-Tank Installation, Dry Leg	20
3-2.1.2.2-3	Closed-Tank Installation, Dry Leg Transmitter Above Datum Line	21
3-2.1.2.2-4	Closed-Tank Installation, Dry Leg Transmitter Below Datum Line	22
3-2.1.2.2-5	Closed-Tank Installation, Wet Leg	23
3-2.1.2.2-6	Closed-Tank Installation, Wet Leg Transmitter Above Datum Line	24
3-2.1.2.2-7	Closed-Tank Installation, Wet Leg Transmitter Below Datum Line	25
3-2.1.2.2-8	Closed-Tank Installation, Dry Leg Transmitter Above Upper Process Tap	26
3-2.1.2.3-1	Repeater-Type Level-Measurement Device	26
3-2.1.3.1-1	Hydrostatic Head Provides One Method of Density Measurement	27
3-2.1.3.1-2	Differential Hydrostatic Head Increases Sensitivity of Density Measurement	27
3-2.1.3.2-1	Common Method of Measuring Density of a Process Liquid	28
3-2.2.1-1	Typical Drum Water Level	28
3-3.1.1-1	Bourdon Gauge	29
3-3.1.1-2	Bourdon Tubes	30
3-3.1.2-1	Bellows Gauge	30
3-3.1.3-1	Slack Diaphragm Gauge	31
4-1	Pressure-Measurement Calibration Hierarchy	36
5-1-1	Tap Geometry	38
5-1-2	Pressure-Tap Flow Field	38
5-1.1-1	Errors for Different Size Taps in Fully Developed Pipe Flow	38
5-1.2-1	Relative Tap Errors as Percent of Dynamic Pressure	39
5-2.1.1-1	Impact Tube	40
5-2.1.1-2	Variation of Total Pressure Indication With Angle of Attack and Geometry for Pitot Tubes	41
5-2.1.2-1	Keil Probe	42
5-2.1.2-2	Total Pressure Location on a Cylinder in a Flow Field	42
5-2.2.1-1	Static Tube	42
5-2.2.1-2	Pitot-Static Tube	43
5-2.2.2-1	Cylindrical Probe, Principle of Operation	43
5-2.2.2-2	Wedge-Type Probe	44
5-2.2.2-3	Spherical- and Cone-Type Probes	44
5-2.2.3-1	Basket Probe	45
5-2.2.3-2	Alternate Basket Probe	45
5-2.2.4-1	Magnitude of Probe-Blockage Effects, Pressure Error	46
5-2.2.4-2	Magnitude of Probe-Blockage Effects, Mach Number	47
5-4.3-1	Seal Assembled With Capillary	49
5-4.3-2	Diaphragm Seals and In-Line Diaphragm Seals Installed	49
5-4.3-3	Diaphragm Seals and Probe Seal Installed	50
5-4.3-4	Threaded Diaphragm Seal	50
5-4.3-5	Flanged Diaphragm Seals	50
5-4.3-6	Integral Flange and Diaphragm Seal	51
5-4.3-7	Separate Flange and Diaphragm Seal	51
5-4.3-8	Pancake Diaphragm Seal With Capillary Connection	51
5-4.3-9	Pancake Diaphragm Seal Installed	52
5-4.3-10	Flange Extension	52
5-4.3-11	Pancake Extension	53
5-4.7-1	Vapor Pressure Curve of a Fill-Fluid	54
5-4.9-1	Response Time	55
5-4.10-1	Installation Consideration of Pressure Instrument and Diaphragm Seals	56

Tables

2-3-1	Pressure Conversion Factors	4
3-1.3-1	Pressure Instrument Summary	13
3-2.1.2.2-1	Seal-Fluid Selection Chart	19
3-2.1.2.2-2	Type of Calibration Required for Various Transmitter Applications	24
3-2.1.3.2-1	Variations in Density for Different Fluids	25
6-7-1	Uncertainty Due to Random Error	59
6-7-2	Throttle-Pressure Uncertainties	59
6-7-3	Exhaust-Pressure Uncertainties	59
6-7-4	Condensate-Flow Uncertainties	59

Form

3-3.6-1	Recording of Gauge-Test Data Sample	35
---------	---	----

Nonmandatory Appendices

A	Piston Gauges.....	61
B	Manometers.....	67
C	Low-Absolute-Pressure (Vacuum) Instruments	72
D	References and Bibliography	82
